The other one was a very successful person who was respected in society and had a wonderful family. Some people wanted to find out why two brothers from the same parents, brought up in the same environment, could be so different.

The first one was asked, "How come you do what you do? You are a drug addict, a drunker, and you beat your family. What motivates you?" He said, "My father." They asked, "what about your father?" The reply was, "My father was a drug addict, a drunker and beat my mum and us. What do you expect me to be? That is what I am".

They went to the brother who was doing well and respected in society and asked him, "How come you are successful? What is your source of motivation?" He said, "My father." They asked, "What about your father?" the reply was, "When I was a little boy, I used to see my dad drunk and doing all the wrong things. I made up my mind that is not what I wanted to be".
