GOVERNMENT OF MEGHALAYA

PRESS RELEASE

CM launches MEGHGO - Meghalaya's Unified Mobility Platform

Shillong, 17th Nov 2026: Hon'ble Chief Minister, Shri Conrad K Sangma, today, launched MeghGo, the state's Unified Mobility Platform at a program held at U Soso Tham Auditorium in the presence of Deputy Chief Minister, Shri Sniawbhalang Dhar and officials from the transport department.

In his address Chief Minister, Conrad K Sangma, said the launch of MeghGo, Meghalaya's Unified Mobility Platform, represents an important milestone in Meghalaya's transport modernization journey. “This mobility app will support local drivers that will provide a commission free app platform for taxi drivers including auto and two wheeler operators to increase and simplify access for passengers,” he said adding that the primary goal is to improve system efficiency while ensuring affordable and systematic access for tourists and local citizens.

Speaking further on future integration and enhancing the app the Chief Minister said that planes are underway to link the app with 3000 government-funded homestays to create a one-stop booking solution for tourists. He also suggested expanding the platform’s utility to include agricultural logistics by connecting farmers with pick up vehicles. “There is potential even to integrate cold storage vehicles into the app once the pilot project expands,” he said.

MeghGo has been conceived as a Government-owned mobility platform that will progressively integrate multiple mobility services through a single digital interface. Its benefits for citizens include improve accessibility and convenience, enhanced safety and transparency, provides easier access to transport services improving service quality and reliability, facilitates grievance redressal and accountability and create a seamless user experience for residents and visitors. The platform will also generate valuable mobility data that can support evidence-based planning and future transport policy interventions. MeghGo also seeks to enhance visibility and market access for local operators while promoting professionalism, safety and service quality. The platform is expected to create improved earning opportunities and strengthen livelihoods through technology-enabled mobility services.

The platform will progressively integrate, Taxi services, Bike taxi services, shared mobility services, services that being immediately launched, Tourist transport services, Bus ticketing and passenger information systems, Parking services, Electric mobility solutions and Passenger helicopter booking services.

The app supporting English, Khasi, Garo and Hindi languages is designed to formalize Shillong's transport sector through transparency and driver welfare providing a government-monitored system for passengers and drivers. Safety features include sharing journey details with trusted contacts, emergency alerts and customer support. The app operates on a zero-commission model with drivers paying a daily subscription fee of ₹ 15 for bikes, ₹ 20 for autos and ₹ 35 for cabs. These subscription fees are managed by government society to provide insurance and performance rewards.

A specialized technological intervention enables shared taxi model by mapping around 39 routes in the city allowing drivers and passengers to see availability at upcoming stops to reduce idle time and congestion.
